

Health Sciences Laboratory Animal Services

This is to certify that

Forough Jahandideh
has successfully completed the

Part 2 Species Required Training In The Mouse

January 24, 2018

Tamie Adams

Course Instructor
Health Sciences Lab Animal Services
University of Alberta

Syllabus and Competency Record

A. Module and Wet Lab Components

Module and lab will cover basic biology, husbandry, handling/restraint, euthanasia, (CO2 in lab), zoonosis and human safety regarding use of the mouse model in research.

B. WET LAB COMPONENTS

1. HANDLING & SEXING

Complete a health assessment and physical examination on the mouse. Identify and review pain assessment in this species. Must be able to identify sex of the animals, demonstrate humane handling and restraint of the species.

2. EUTHANASIA

Co2 euthanasia completed, other acceptable methods will be discussed.
Student must be able to confirm death has occurred.
